

movement

for living[®]

Let's get moving. **Please join in!**

If you or someone you care for has tight, stiff muscles related to multiple sclerosis, stroke, cerebral palsy, spinal cord injury or brain injury, you know that this condition (called severe spasticity) can make movement difficult or uncontrollable. It can make doing even the smallest things exhausting or impossible.

Did you know that there is a therapy available that may help provide better movement and control?

Come learn about it at a seminar where a doctor will talk about severe spasticity and explain how the therapy works. You'll also hear from a *Movement for Living*[®]

Ambassador who will share personal experiences with this therapy. Best of all, you'll be able to ask questions and meet others exploring their options for reaching their full potential.

Don't miss this important event!

There is no cost to attend this seminar.

Family and friends are welcome.

Food provided by Season's Catering

Sponsored by Medtronic, Inc.
