Community Health Needs Assessment Survey

REQUESTING YOUR FEEDBACK

Gaylord Hospital is requesting your feedback by completing this community needs assessment survey. In March 2010, the U.S. Congress passed the Patient Protection and Affordable Care Act, which requires not-for-profit hospitals to conduct a Community Needs Assessment once every three years. To meet the requirements the hospital must obtain community input. Because of the unique level of service provided by Gaylord Hospital, we define our community to include both patients and past patients requiring post-acute level inpatient care for Traumatic Brain Injury, Stroke, Spinal Cord Injury, and Pulmonary/Ventilator Weaning and outpatients or community members who need Physical, Occupational and Speech Therapy as well as support services such as wheelchair and brace clinics. We hope you will take a few moments to complete this brief survey. Your responses will be confidential and will help Gaylord better identify the needs of the brain injured population. This survey will take approximately 5 minutes.

Thank you in advance.
